### **Hering AG expands its list of references in the field of gland steam condensers**

Venture Global Plaquemines LNG, LLC is developing a LNG export facility in Plaquemines Parish, Louisiana, approximately 20 miles south of New Orleans. When completed, Plaquemines LNG will have an export capacity of up to 20 million tons per year (source:<https://venturegloballng.com/project-plaquemines>).

Hering AG is involved in this project due to a well-known turbine manufacturer with a total of 4 gland steam condensers. This project underlines the performance of Hering AG and adds another meaningful reference in the field of gland steam condensers.
