HERING supplies first Gland Steam Condenser for a hydrogen power plant in the USA

HERING AG supplies GSC for a 485 MW combined cycle power plant in Ohio / USA - a pilot project specially built for the transition from natural gas to hydrogen mixtures and ultimately capable of burning 100% hydrogen. Special requirements Gland Steam Condenser plant have been developed and successfully implemented in cooperation with our customer.

We are happy and proud to be part of the new hydrogen technology and to be able to make our own contribution to global CO2 reduction.
