System supplier for the Russian greenhouse market

HERING AG received the order to manufacture various exhaust gas components for several Russian greenhouse projects.

The delivery scope of HERING AG comprises pre-assembled heat recovery modules, consisting of exhaust gas heat exchanger, bypass with modulating control, silencer, chimneys and insulation.

Overall, HERING AG will provide more than 50 natural gas engines with exhaust gas components for several locations across Russia within the next three months.

The picture shows the first 10 exhaust gas heat exchangers including mounted bypass before the dispatch at our premises in Gunzenhausen.
