News 03/2015

Hering AG is strengthening its leading market position in development and production of Gland Steam Condensers.

Hering AG was able to consolidate and expand the leading market position in the development and manufacturing of Gland Steam Condensers. This is proven by the delivery of 26 units in 2014 as well as a continuous order intake. Until March 2015 7 Gland Steam Condensers were already shipped to the globally acting customer base and more units are already in production.

Hering AG is developing and producing Gland Steam Condensers including fan/blower units in various sizes according to customer specifications.

The units are developed and manufactured corresponding DIN EN 13445, European pressure equipment directive PED, ASME-Code, API Standard, TEMA, and additional international standards.
