## News 03/2016

Hering AG strengthen its position as marketleader in France

Hering received the order for producing the exhaust heat recovery equipment for 15 GE JMS624 engines installed in western of France. The thermal output is approximate 30 MW.

The exhaust heat exchangers will be installed for greenhouse applications in the area between Nantes and Bordeaux. Start up for this plants will be in autumn 2016.

Most of the units will be delivered within two months, which shows our manufacturing capacities and our high flexibility.
