### HERING AG supplies 5000ths shell & tube heat exchanger for sweets industry

HERING AG has a more than 20 years old tradition for supplying shell & tube heat exchangers for the chocolate industry. This so called "Chocolate-Heat Exchangers" are used for cooling, or heating up chocolate in production lines for "Easter bunnies" or "Santa Claus" out of chocolate. Rarely no chocolate bar is produced without the use of one heat exchanger from HERING.

Due to the strict separation of carbon steel and stainless steel manufacturing, HERING guarantees all high food quality standards and is worldwide famous for it's "Chocolate-Heat Exchangers".
