### Hering delivers exhaust gas heat exchangers for Canadian goldmine

In the end of March HERING AG delivers two exhaust gas heat exchangers to the north of the Canadian state of Ontario. Both waste heat exchangers are using the thermal heat of the exhaust gas from two GE Waukesha engines and supply the local goldmine with heat.

The exhaust gas heat exchangers are suitable for outdoor installation on the roof of the engine containers. They defy the Canadian winter with temperatures down to  $-40^{\circ}\text{C}$ . The delivery also includes a bypass-system and the safety equipment for the exhaust gas heat exchangers.

The whole system is manufactured according ASME Code and includes CRN (Canadian Registration Number).
