News 06/2017

HERING AG delivers three exhaust gas heat exchangers for a CHP project in Russia.

HERING AG has designed and fabricated three exhaust gas heat exchangers for our new client in Estonia. The heat exchangers will be used for a city district heating network in Russia.

These heat exchangers are designed and produced acc. EAC standards and are certified for the eurasiens customs union. Since middle of last year, HERING is able to produce heat recovery units according EAC standards and is seeing an increasing business activity in this market.

The exchangers recover a thermal power of 4.220 kW in total.
