Hering AG delivers an economiser for waste heat utilization

Hering AG produces and delivers 2 economisers for waste heat utilization after 2 Gas turbines in a large German tire factory.

Plant data: Each Eco 1,400 kW, 475 m² heating surface with fin tubes made by Hering AG in Gunzenhausen. Exhaust gas cooling from 180 ° C to 120 ° C. Feed water will be heated up from 75 ° C to 96,8 ° C.

In addition to the heat exchangers Hering AG supplied the necessary wastegas control butterfly valves and the high-temperature exhaust compensators.

On-site installation

Shipment preparation

Once again Hering AG points out its market leadership for customized heat exchangers.
